(248) 226-0519 · [Linkedin](#) · [Hudah@umich.edu](mailto:Hudah@umich.edu) · [Github](#) · [Portfolio](#)

## Education

University of Michigan Dearborn

August 2021 – August 2024

- Bachelor of Science in Computer Science (3.5 GPA)

Scrum Product Owner Certification

April 2022

## Leadership Roles

Women Techmakers, *Ambassador*

August 2023 - Present

Google Developer Student Club, *Vice President*

Sep 2022 - Present

## Work Experience

Bosch USA

Software Engineer Intern – Google Cloud/Android App Development/Product Management

05/2022 - Present | Plymouth, MI

- Took **requirements** from stakeholders and worked cross-functionally with technical leads, product director, Android app team, marketing, and ML engineers for a **Machine Learning** Application
  - **Design the UI** for the app, incorporating user pain points and user feedback into the design, enhancing the **user experience**
  - **Collaborate** with the team on product design, ideation, strategy, **execution** and prioritization
  - Demo the product features to the stakeholders, learn from **feedback**, and give updates to leadership on current progress and future scope and dependencies.
  - **Develop** and implement an Android application in Java to showcase **real-time predictions** from a machine learning model, improving user interaction with data
  - Leverage **Google Cloud Platform** services to efficiently collect, preprocess, and label **large datasets** required for **training** the machine learning model, optimizing data storage and retrieval processes
- Env: Jira, Figma, Python 3.10.X, Google Cloud Platform, Java, Android Studio, Git

## Projects

ProductAssist.AI — *Startup Co-Founder/Product Management*

03/2023 - Present | Farmington Hills, MI

- **Innovate gen AI-powered software**, streamlining product management tasks & boosting productivity
- Gather and incorporate **customer feedback** into the software development process, leading to iterative improvements and boosted user satisfaction
- Lead the **strategic product roadmap**, aligning it with company vision & market dynamics

Report Dashboard — *Developer*

05/2022 - 10/2022 | Plymouth, MI

- **Collaborated** with the simulation team to automate validation of SIL output, using Django & React.JS
- Env: Python 3.X, Pandas, NumPy, SQLite, VBA, Django REST framework, JavaScript, React, jQuery

Ford & SAE Mobility Forward — *Product Management*

09/2021 - 11/2021 | Dearborn, MI

- Conducted **market & data analysis** to create a **stakeholder report** & mobile app, placing top three
